

Incentives & Business Promotion in the Town of Cary

The Town of Cary is open for business! The Town Council, a seven member publicly elected governing body, has established its own Economic Development Commission (EDC) to help formulate policies that will further promote commercial expansion within the town for new and existing businesses.

The EDC mission is to help Cary become the premier employment center within the Triangle region. In addition to offering an extremely high quality of life for its citizens, the Town of Cary considers offering incentives to corporations that are relocating to, or expanding within, the corporate limits of Cary. Evaluations of various incentive packages are done on a project by project basis and are awarded directly by the Town Council. Through activities of the EDC, the Town of Cary hopes to partner with new and existing businesses to benefit corporations, their employees, as well as the current and future citizens of Cary.
